

# iot.schema.org

Community Teleconference

November 15, 2018

# Agenda

- Report out
- (30) Knowledge Extraction from Existing IoT Ontologies
- (10) Aligning VSS ontology with WoT and SOSA
- (10) Energy Reporting
- Start discussion on a new W3C Community Group
- AOB

# Report out

- WoT plugfest at TPAC
- Joined TPAC sessions on spatial data, devices and sensors, and participated in informal discussions
- Alignment with SSN and other ontologies
- Tools and patterns work in progress
- Community Group (discussion later)

# W3C Community Group

- WoT CG
  - Does the new `iot.schema` work displace other work?
  - Idea was to incubate new definitions in the WoT CG
  - Re-charter of IG and WG may reactivate the CG
  - Large membership, how many would be interested?
- New CG
  - Need 5 total participants
  - Could focus the charter on `iot.schema.org`
  - Definitions, practices, patterns, and tools could all be addressed
  - Starting with small membership
